Project Proposal

Team 17

Joshua Schell, Shane Kirkham, Brianna Brooks, Sabrina Rowland-Cote, and Celine Eido

We will be creating a website that will allow future and current Interactive Media Design students to keep up to date on course information and teacher information. It will show students course outlines, timetables, and the teachers who will be teaching those classes.

The team will be using Github issues to manage and assign tasks, as well as progress tracking. The team's general communication will be through Facebook Messenger. This will be used to communicate meetings, needs, or questions. The team will be meeting every Tuesday at 11 am to access our progress as well as discuss any issues we have with the project and a plan to overcome them.

To make everything run smoothly we broke the team into different roles. Joshua is the Team Lead and Programmer, Shane is the Lead Programmer, Sabrina and Celine are the Lead Designers, and Brianna is the Lead Content Creator.
